National Modeling & Simulation Coalition

**JOIN TODAY AND LEVERAGE**

## **THE NATIONAL MODELING AND SIMULATION COALITION**

(NMSC) is a cross-discipline organization of stakeholders in the Modeling and Simulation (M&S) industry. The vision of the NMSC is to serve as the capstone organization to promote and leverage M&S to better the human condition and to strengthen the National well-being. The NMSC is the only national organization representing M&S across all domains and disciplines including health care, manufacturing, industrial development, energy, transportation, education, homeland security, defense and others. This coalition was formed in 2012 by a committed network of individuals, corporations, national and international associations, academic and research institutions, governmental organizations, and organizations supporting the government – all using M&S technologies to further advance their domains and disciplines.

**GE THE BENEFITS OF THIS NA**

**THE MISSION** of the NMSC is to create a unified national community of individuals and organizations around M&S technology and professional practice. Its role and purpose is to serve the needs of all components of the M&S community, to promote and further a national agenda for modeling and simulation, and to drive its growth and use into broad areas to support our national economy, welfare, and security. Specifically, the NMSC:

- **REPRESENTS** the M&S industry nationally across domains; participates in discussions and dialogue with government organizations and presents a consolidated position with facts and data in support of the M&S industry on various issues.
- **ADVOCATES** for improvements to acquisition policies and practices applicable to the government procurement process and use of M&S technologies.
- **PROMOTES** awareness across commercial sectors in order to expand the use of M&S in manufacturing, healthcare, transportation, security and other areas key to the safety and security of our nation.
- **SPONSORS** public relations activities that support development of M&S technologies across all domains.
- **CONDUCTS** studies and analyses aimed at improving the cost effective development and acquisition of solutions using M&S across domains to improve research, design, development, manufacturing and operational conditions.
- **PROMOTES** government and commercial use of M&S in new and innovative ways to improve our business practices and the industrial development of our nation.

## **BOTH INDIVIDUAL AND ORGANIZATIONAL/CORPORATE**

memberships are available for the NMSC, providing members with substantial benefits. These benefits afford you the opportunity to:

- **GROW** your organization and business in new and adjacent markets through networking across M&S domains and disciplines
- **BE A VOTING MEMBER**, allowing you to participate in the NMSC National Policy Committee and its Standing Committees to further the national M&S agenda
- **ATTEND** all business meetings as a voting member of the coalition, and have a voice in the national agenda, action plan, and advocacy plans for modeling and simulation
- **RECEIVE** discounts to all national and regional events sponsored by the coalition
- **RECEIVE** attendee discounts at events sponsored by the National Training and Simulation Association (NTSA) to include the Interservice/Industry Training, Simulation and Education Conference (I/ITSEC)
- **ACCESS** to ModSimConnected, a national collaboration site dedicated to the sharing of knowledge, shareable simulation tools and models, and technical content relevant across domains and disciplines
- **CONNECT** with key national decision-makers establishing national priorities and policies regarding modeling and simulation
